Item #98855

32" European Terra Cotta Patio Pond
Item #98858

40" European Terra Cotta Patio Pond
Item #98861

Instructions

STEP 1

- Thoroughly rinse the patio pond (Ex. 1).

STEP 2

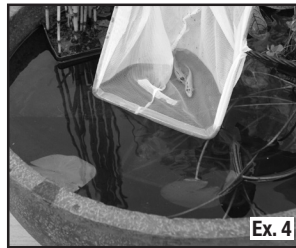

- Place the Patio Pond in your desired location and fill with water. Let the water sit overnight or use a water conditioner like Aquascape Pond Detoxifier before adding plants or fish (Ex. 2).

STEP 3

- Place marginal plants on the integrated plant shelf, and use the space in the center of the bowl for a water lily or floating plants (Ex. 3).

STEP 4

- If desired, add a few small fish for color and movement. We recommend two or three small goldfish or Rosy Reds (Ex. 4).

Optional Enhancements (sold separately)

AQUASCAPE BAMBOO FOUNTAINS

- Adding a fountain to your Patio Pond allows you to bring the sound of running water into almost any setting. We recommend one of the following:
 - Deer Scarer Bamboo Fountain (#78013)
 - Pouring 3-Tier Bamboo Fountain (#78015)
 - Adjustable Pouring Bamboo Fountain (#78014)

AQUASCAPE LED LIGHTING

- Aquascape LED lighting allows you to extend the enjoyment your Patio Pond into the nighttime. We offer several options to customize your lighting arrangement.
 - Garden and Pond LED Spotlight Kit (#84030)
 - Garden and Pond 1-Watt LED Waterfall and Up Light (#84032)
 - Garden and Pond 1-Watt LED Spotlight (#84031)

AQUASCAPE CONTAINER WATER GARDEN FILTER

- The Aquascape Container Water Garden Filter (#77005) provides efficient filtration, aeration, and water movement, helping to reduce maintenance and maximize fish and plant health.

General Maintenance

The Aquascape Patio Pond is simple and easy to maintain. We recommend performing a weekly water change, using a bucket or small clean container to remove approximately 15% of the water. Slowly add detoxified tap water to replace the removed water. If using a garden hose, run the hose for a few minutes to remove stagnant water. Note: topping off evaporated water does not count as a water change.

Winterization

- In areas subject to freezing temperatures, the Patio Pond should be stored indoors or in a frost-free location.
